CAREER OBJECTIVE

Software Developer with hands-on experience in Angular, React, Java, Spring Boot, REST APIs, and PostgreSQL through real-world project development. Experienced in building web applications, implementing business logic, working with databases, and developing scalable APIs. Seeking a Software Engineer opportunity to contribute to real-world products while continuously strengthening my technical skills.

EDUCATION

Master of Computer Applications (MCA) — Bharathiar University, Coimbatore (2024-2026)

Percentage: 75%

Bachelor of Science in Computer Technology — Hindusthan College of Arts & Science, Coimbatore (2021-2024)

Percentage: 71%

AREAS OF INTEREST

Artificial Intelligence & Machine Learning, Web Technologies, Mobile Application Development

PAPER PRESENTATIONS & CONFERENCES

- National Level Paper Presentation, Sri Ramakrishna College of Arts and Science — “5G Technology”
- International Conference on Computing, SRM Institute of Technology — “Crop Yield Prediction Using Machine Learning”
- International Conference on Advances in AI and ML, PSGR Krishnammal College for Women — “Performance of Transport Layer in Wireless Sensor Networks (WSN)”

ACADEMIC PROJECTS

IsaiCraft: An Intelligent Audio Processing Ecosystem for AI-Powered Music Production

- Designed and developed an AI-powered neuro-acoustic music production platform that combines Meta's MusicGen for generative AI-based instrumental composition with a custom soft-pitch correction algorithm to enhance vocals while preserving natural vibrato.
- Implemented a scalable three-tier architecture using React, FastAPI, and a remote GPU engine, integrating Google Gemini AI for AI-driven vocal coaching and an automated Digital Signal Processing (DSP) mastering pipeline.
- Leveraged Gemini AI, MusicGen, Prompt Engineering, and AI-assisted development tools to accelerate development and build an intelligent, end-to-end music production platform.

Kal – Read and Learn Android Application

- Developed an AI-powered Android reading and learning platform using Kotlin, Jetpack Compose, Firebase and Gemini AI, integrating reading, quizzes, rewards, publishing and author promotion.
- Built an AI quiz generation pipeline using Node.js and Gemini AI to extract book content and dynamically generate contextual questions based on reading progress.
- Implemented Firebase Authentication, Firestore and Storage for secure user management, reading progress, quiz results, coin transactions and digital content storage.
- Applied MVVM + Hilt architecture, Kotlin Coroutines/Flow and Jetpack Navigation to create a modular, maintainable and responsive Android application.

Empowering Agriculture through Online Platform (PHP)

- Engineered a PHP-MySQL e-commerce platform connecting farmers directly to customers for selling organic produce.
- Enhanced transaction efficiency by 40% through secure payment gateway integration and optimized data handling.
- Facilitated fair trade by enabling transparent pricing for rice, seeds, and millets.

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, PHP, Kotlin

Web: HTML5, CSS3, JavaScript, React.js, Angular

Backend: Spring Boot, Node.js, REST APIs

Database: MySQL, PostgreSQL, Firebase

Tools: Git, GitHub, Android Studio

AI/Developer Tools: ChatGPT, Claude, Gemini

INTERNSHIP

Prime Solutions — Web Development Intern (HTML, CSS) | February 2024 – February 2024

- Developed responsive web interfaces and improved UI design consistency across project deliverables.

PROFESSIONAL EXPERIENCE

EliteEikan Technologies LLC | Project Trainee | January 2026 – July 2026

Collaborated as a Full-Stack Developer on a comprehensive enterprise application. Responsible for building scalable backend services with Spring Boot and PostgreSQL (Hibernate/Flyway), paired with a responsive Angular frontend. Engineered complex automated workflows, including a Python/FastAPI microservice for OCR document extraction (PaddleOCR/Tesseract) and secure email integrations via GraphQL and Azure Auth. Additionally, implemented mass data processing features using Apache POI to optimize core data management operations.

CERTIFICATION COURSES

- BI Dashboards with IBM Cognos Analytics and Google Looker — Coursera
- Introduction to Internet of Things — NPTEL
- Introduction to Graphic Design with Photoshop — Great Learning
- Digital Image Processing — MathWorks
- Microsoft Power Platform Fundamentals — Microsoft

ACHIEVEMENTS

- Organizer & Magazine Editor-National Level Technical Symposium
- College-Level Poster Designing Competition — Sustainable Computing for Industry 5.0

KEY SKILLS

Problem-Solving, Team Collaboration, Communication, Time Management, AI-assisted Software Development, Prompt Engineering
