PROFESSIONAL SUMMARY

Software Developer with hands-on experience building full-stack applications, backend services, REST APIs, database-driven systems, Android applications, and AI-integrated solutions. Experienced with Java, Spring Boot, Python, FastAPI, Angular, React.js, Kotlin, PostgreSQL, MySQL, Firebase, and Node.js. Built enterprise applications, OCR-based microservices, AI-powered learning platforms, and intelligent audio-processing systems. Strong foundation in software architecture, API integration, database management, problem-solving, and AI-assisted development.

TECHNICAL SKILLS

PROGRAMMING: Java, Python, JavaScript, PHP, Kotlin

FRONTEND: Angular, React.js, HTML5, CSS3, JavaScript

BACKEND: Spring Boot, Node.js, Python FastAPI, REST APIs

DATABASES: PostgreSQL, MySQL, Firebase

ANDROID: Kotlin, Jetpack Compose, Firebase, Android Studio

AI & DEVELOPER TOOLS: Google Gemini, ChatGPT, Claude, Prompt Engineering

TOOLS: Git, GitHub, Android Studio

PROFESSIONAL EXPERIENCE

EliteEikan Technologies LLC | Project Trainee | January 2026 – July 2026

- Developed scalable backend services using Spring Boot and PostgreSQL, with Hibernate and Flyway for persistence and database migration management.
- Built and integrated a responsive Angular frontend with backend services for an enterprise application.
- Engineered a Python/FastAPI microservice for OCR document extraction using PaddleOCR and Tesseract.
- Integrated secure workflows using GraphQL and Azure Authentication.
- Implemented mass data-processing features using Apache POI to support large-scale document and data operations.

Prime Solutions | Web Development Intern | February 2024 (15 days)

- Developed responsive web interfaces using HTML and CSS and improved UI consistency across project deliverables.

SOFTWARE PROJECTS

IsaiCraft | AI-Powered Music Production Platform

- Designed and developed an AI-powered music production platform combining Meta MusicGen for generative instrumental composition with a custom soft-pitch correction algorithm for natural vocal enhancement.
- Implemented a three-tier architecture using React, FastAPI and a remote GPU engine, integrating Google Gemini for AI-powered vocal coaching.
- Built an automated Digital Signal Processing (DSP) mastering pipeline and integrated AI-assisted development workflows.

TECHNOLOGIES: React, FastAPI, Python, Google Gemini, MusicGen, DSP, Prompt Engineering

Kal – Read and Learn | AI-Powered Android Reading & Learning Platform

- Developed an Android reading and learning platform using Kotlin, Jetpack Compose, Firebase and Gemini AI with reading, quizzes, rewards, publishing and author-promotion features.
- Built an AI quiz-generation pipeline using Node.js and Gemini AI to extract book content and generate contextual questions based on reading progress.
- Implemented Firebase Authentication, Firestore and Storage for user management, reading progress, quiz results, coin transactions and digital content storage.
- Applied MVVM, Hilt, Kotlin Coroutines/Flow and Jetpack Navigation to build a modular and maintainable Android application.

TECHNOLOGIES: Kotlin, Jetpack Compose, Firebase, Node.js, Gemini AI, MVVM, Hilt, Coroutines, Flow

Empowering Agriculture Through Online Platform | PHP / MySQL E-Commerce Platform

- Developed a PHP-MySQL e-commerce platform connecting farmers directly with customers for organic produce.
- Integrated a secure payment gateway and optimized data handling, contributing to a reported 40% improvement in transaction efficiency.
- Implemented transparent pricing functionality for rice, seeds and millets.

TECHNOLOGIES: PHP, MySQL, Payment Gateway, E-Commerce

Nammalvar Iyerkai Angadi | Flutter / Supabase Retail POS & Store Management Application

- Developed a Flutter-based retail POS and store-management application for managing products, sales, inventory and multi-seller operations.
- Implemented role-based workflows for administrator and seller users with sales tracking, inventory management and reporting.
- Integrated Supabase/PostgreSQL-backed data management for persistent application data.

TECHNOLOGIES: Flutter, Supabase, PostgreSQL, Android, Role-Based Access, POS, Inventory Management, Sales Reporting

EDUCATION

MASTER OF COMPUTER APPLICATIONS (MCA)

Bharathiar University, Coimbatore | 2024–2026 | Percentage: 75%

BACHELOR OF SCIENCE IN COMPUTER TECHNOLOGY

Hindusthan College of Arts & Science, Coimbatore | 2021–2024 | Percentage: 71%

RESEARCH & PAPER PRESENTATIONS

- "5G Technology" — National Level Paper Presentation, Sri Ramakrishna College of Arts and Science
- "Crop Yield Prediction Using Machine Learning" — International Conference on Computing, SRM Institute of Technology
- "Performance of Transport Layer in Wireless Sensor Networks (WSN)" — International Conference on Advances in AI and ML, PSGR Krishnammal College for Women

CERTIFICATIONS

- BI Dashboards with IBM Cognos Analytics and Google Looker — Coursera
- Introduction to Internet of Things — NPTEL
- Introduction to Graphic Design with Photoshop — Great Learning
- Digital Image Processing — MathWorks
- Microsoft Power Platform Fundamentals — Microsoft

ACHIEVEMENTS

- Organizer & Magazine Editor — National Level Technical Symposium
- College-Level Poster Designing Competition — Sustainable Computing for Industry 5.0
